

By 2013, it was clear the original 1972 book and the major 2003 update were becoming difficult to use with yet more generations of Laugen's being born. These documents had outlived their usefulness and in 2013 this website was created to bring the Kongjorden-Laugen family history up-to-date. There are currently thirteen generations and almost 3,000 descendants scattered across the world. Updates are added to the WEB following each "Forsamling" which usually occurs in late June each year.

While not everyone is able to attend the "Forsamlings" it is important for future generations to keep this site as current and up-to-date as possible. Please check your immediate family information. If you have any changes or updates, please send them to the webmaster using the link on this site. We appreciate all your help. If you do not have a User ID, just click on any menu and 'Register for a new user account' at the bottom of the page. Welcome and enjoy browsing your family heritage.
